PROFESSIONAL SUMMARY

Passionate **Full-Stack Engineer** with 4+ years of experience designing, developing, and delivering scalable, secure, and user-friendly web applications. Strong expertise in .NET, C#, ASP.NET Core, ASPX, JavaScript, SQL Server, RESTful APIs, and frontend-backend development. Experienced in developing business workflows, API integrations, database optimization, ETL processes, and third-party integrations. Hands-on experience with AWS services including S3 and Lambda, with exposure to Microsoft Azure for cloud-based application deployment and infrastructure. Skilled at transforming complex business requirements into reliable, maintainable solutions while collaborating effectively across the complete software development lifecycle.

WORK EXPERIENCE

Mazda Consultancy Services Pvt. Ltd. *March 2023 – Present*

Senior Full-Stack Engineer · **Travel Commerce Engine**

October 2025 – Present

This web application is a centralized travel commerce platform for managing pricing, promotions, discounts, customer groups, and commercial rules across multiple country-specific travel websites.

- Developed pricing and promotion management workflows for travel products and multiple markets
- Implemented configurable pricing rules, price floors, campaigns, and discount codes based on business requirements.
- Worked on rule orchestration and priority management to handle conflicting pricing and promotional rules.
- Developed customer-group-based workflows for targeted pricing and promotional strategies.
- Implemented synchronization workflows to distribute pricing and rule changes across country websites.
- Developed monitoring features to track system status and synchronization health.
- Tech stack: .NET, C#, ASP.NET Core, Angular, REST APIs, SQL Server, AWS, ETL

Senior Full-Stack Engineer · **Travel Package Builder**

Nov 2024 – October 2025

This web application is a travel package creation platform for building itineraries with flights, hotels, cruises, transfers, tours, trains, ferries, and excursions. It manages availability, suppliers, pricing, and publishing.

- Developed package creation workflows with configurable itinerary components.
- Implemented flight, hotel, cruise, and transfer configuration with supplier selection.
- Built availability workflows with sync frequency and date restrictions.
- Implemented pricing, discounts, commissions, and charges.
- Developed deal configuration and publishing workflows.
- Built package summary and validation before submission.
- Tech stack: .NET, C#, ASP.NET Core, Angular, REST APIs, SQL Server

Senior Full-Stack Engineer · **Travel Master Management System**

October 2023 – Nov 2024

This web application is a centralized Travel Master Management System for managing travel-related master data, availability, caching, synchronization, and operational processes across flights, hotels, cruises, transfers, tours, and trains.

- Developed centralized master data management for flights, hotels, transfers, tours, train stations, trains, and hotel inventory.
- Implemented route and availability management with airline, destination, date, and night-based filters.
- Built cruise availability workflows with cruise line, ship, embarkation/disembarkation ports, and pricing availability.
- Developed package synchronization history with configurable filters, sync frequency, date ranges, and execution tracking.
- Built job monitoring and dashboard functionality for tracking background processes and system activities.
- Tech stack: .NET, C#, ASP.NET Core, Angular, REST APIs, SQL Server

Rishvi Ltd (UK) – Freelance *December 2022 – Present*

Senior Full-Stack Engineer · **Messina Hembry – E-commerce Automation Platform** *July 2023 – Present*

This web application is a multichannel e-commerce listing and automation platform for a UK pre-owned fashion retailer, managing product cataloguing, image processing, pricing rules, and listing synchronization across eBay, Shopify, and TikTok Shop through Linnworks integration.

- Developed modular .NET 8 backend with EF Core, Dapper, JWT authentication, and role-based permission management.
- Integrated Linnworks APIs for multichannel inventory synchronization and built channel modules for eBay, Shopify, and TikTok Shop listings.
- Implemented background job processing with Hangfire and cron-based recurring jobs for listing, pricing, and sync workflows.
- Built automated image-processing pipeline using AWS S3 storage and SQS-driven listener services.
- Developed rule-based pricing engine with brand-percentage lookups, pricing discounters, and price suggestion logs.
- Built Angular admin panel screens for listings, pricing, image processing settings, users, roles, and scheduled jobs.
- Worked with third-party API integrations and handled authentication, request/response mapping, pagination, rate limits, and synchronization failures.
- Implemented JWT-based authentication and authorization with role-based access control for secure administration of platform features.
- Tech stack: .NET 8, C#, ASP.NET Core, Angular, EF Core, SQL Server, Hangfire, AWS (S3, SQS, Lambda), Linnworks API

Full-Stack Engineer · **Warehouse Management & Analytics Dashboard** *December 2022 – July 2023*

This web application is a warehouse management and analytics platform for managing users, inventory, orders, and automated warehouse operations. It integrates with Linnworks for inventory and order processing and uses AWS services for API deployment and frontend hosting.

- Developed user, inventory, and order management dashboards for warehouse operations and analytics.
- Integrated Linnworks scripts for automated inventory synchronization and order processing workflows.
- Built REST APIs for warehouse, inventory, and order-related operations.
- Deployed backend APIs using AWS Lambda for scalable and serverless application processing.
- Hosted and deployed the frontend application on AWS S3.
- Implemented dashboard views for monitoring inventory, orders, users, and warehouse activities.
- Tech stack: .NET, C#, ASP.NET Core, Angular, REST APIs, Linnworks, AWS Lambda, AWS S3, SQL Server

Full-Stack Engineer · **Rishvi HyperView – Linnworks Query & Reporting App** *March 2023 – July 2023*

This web application is a query and reporting tool embedded within the Linnworks platform, enabling e-commerce sellers to run custom queries on operational data with exportable data grids, CSV exports, purchase order import/export, and role-based access control.

- Developed Angular application embedded inside Linnworks with token-based session handoff and IndexedDB persistence.
- Built custom query and reporting screens with dynamic columns, server-side pagination, sorting, and filtering.
- Implemented one-click Excel and CSV export of query results using SheetJS.
- Developed purchase order import with template-based Excel upload, validation, and PO export workflows.
- Built user management with granular role and permission control and multilingual UI support.
- Integrated ApexCharts to create interactive dashboards displaying operational metrics and reporting trends.
- Developed multilingual support using ngx-translate with configurable UI labels and messages.
- Worked on API integration, debugging, testing, and performance improvements across the Angular and Linnworks integration layers.
- Implemented analytics dashboard with ApexCharts for operational data visualization.
- Tech stack: Angular, TypeScript, Angular Material, REST APIs, Linnworks, SheetJS (xlsx), IndexedDB, ngx-translate

Freelance Projects

Full-Stack Engineer · Bluer E-Commerce Platform

July 2023 – October 2023

This web application is a fashion e-commerce platform for managing and selling clothing and accessories, with product discovery, category management, filtering, product details, shopping cart, checkout, customer accounts, order tracking, returns, and customer support functionality.

- Built a Shopify store for jeans, dresses, tops, shirts, pants, jackets, and accessories.
- Added product pages with images, sizes, colors, prices, stock, and care details.
- Added product groups and filters for size, color, price, and type.
- Built cart and checkout flows with item count, price, shipping, and payment details.
- Added customer login, order history, order tracking, and return requests.
- Built order and return flows with shipping, delivery, returns, and store credit.
- Added search, sort, filters, page views, offers, and mobile-friendly screens.
- Added help pages for payments, shipping, returns, cancelations, and exchanges.
- Tech stack: Shopify, Shopify Liquid, HTML, CSS, JavaScript, Shopify APIs, REST APIs, Git

Full-Stack Engineer · GannXPro – Stock Market Analysis Platform

August 2022– December 2022

This web application is a stock market analysis and trading intelligence platform that helps traders analyze stocks using Gann-based calculations, technical indicators, market signals, screening, and price-level analysis.

- Developed stock screening functionality using Gann Cardinal Degrees (GCD) and Gann Square of 9 calculations to identify potential support, resistance, reversal, and breakout levels.
- Implemented stock analysis with Buy/Sell signals, confluence scores, trend strength, RSI, support, resistance, breakout levels, and market cycle analysis.
- Developed market dashboards with stock opportunities, sector analysis, market summaries, and upcoming cycle information.
- Implemented interactive stock tables with filtering, sorting, pagination, and detailed stock analysis.
- Optimized database queries and API responses to efficiently process and display large volumes of stock-market data.
- Implemented background processing for periodic market-data updates and automated analysis calculations.
- Built subscription and access-control workflows for premium market analysis features.
- Tech stack: .NET, C#, ASP.NET Core, Angular, TypeScript, REST APIs, SQL Server, Financial Market APIs

TECHNICAL SKILLS

Frontend	Angular, Angular Material, React, Redux, TypeScript, JavaScript, HTML5, CSS3, Shopify Liquid	Backend	C#, .NET Core, ASP.NET, REST APIs, Node.js, Entity Framework, LINQ, Hangfire
Databases	SQL Server, MongoDB, PostgreSQL, IndexedDB, Query Optimization	DevOps	AWS (EC2, S3, RDS, Lambda, SQS, CloudFront), Docker, CI/CD
Data & EL	ETL Pipelines, Data Processing, Data Transformation, Workflow Automation	Tools	GitHub Actions, Git, Postman, VS Code, Jira, Linnworks, Shopify APIs, SheetJS

EDUCATION

B.Tech – Computer Science Engineering · Indus University, Ahmedabad

LANGUAGES

Gujarati (Native) · **Hindi** (Fluent) · **English** (Professional Working Proficiency)
